

# Data Types

[...] indicates control by High Start and High End times, if set.

\* indicates continuous acquisition.

Record Length, seconds:		0.1	1	1	1
Sample rate, Hz:		24,000	2400	150	15
DAMT	"Dense AMT"	[TS2]	TS3*		
AMT	"AudioMagnetoTelluric"	[TS2]	TS3]	TS4*	
ACMT	"AMT-Compatible MT"	[TS2]	TS3	TS4*	
MT	"MagnetoTelluric"		[TS3	TS4]	TS5*

ACMT is unusual because High Start and High End times affect only the highest band, not the usual *two* highest bands.
